PROFESSIONAL SUMMARY

Computer Science student at Egypt-Japan University of Science and Technology (E-JUST), expected to graduate in 2027, with hands-on experience in cybersecurity, penetration testing, vulnerability analysis, computer networking, software development, and artificial intelligence. Completed a 6-month Digital Egypt Pioneers Initiative (DEPI) training program focused on Vulnerability Analysis and Penetration Testing. Additionally, have one year of experience tutoring computer networking. Strong foundation in network security, security assessment, programming, algorithms, databases, and networking technologies.

EDUCATION

Bachelor of Computer Science — Egypt-Japan University of Science and Technology (E-JUST)

Expected Graduation: 2027

Relevant Coursework: Data Structures, Algorithms, Operating Systems, Computer Networks, Database Systems, Artificial Intelligence

CYBERSECURITY & TECHNICAL SKILLS

Cybersecurity: Vulnerability Assessment, Penetration Testing, Vulnerability Analysis, Security Testing, Network Security

Programming: C++, C#, Python, SQL

Networking: TCP/IP, OSPF, BGP, VLAN, SDN, Network Troubleshooting, Cisco Packet Tracer

Software Engineering: Object-Oriented Programming, Data Structures, Algorithms

Artificial Intelligence: MDP, Value Iteration, AI Navigation, State Machines

Game Development: Unity 3D, C# Scripting, Gameplay Systems, Asset Optimization

Databases: MySQL, SQL Query Optimization

Tools: Git, GitHub, Visual Studio, Cisco Packet Tracer

PROFESSIONAL EXPERIENCE

Networking Tutor | 2025–Present

- Provided networking instruction and technical tutoring for students across fundamental and advanced networking concepts.
- Explained TCP/IP, IP addressing, subnetting, VLANs, routing, switching, and network troubleshooting through practical examples.
- Designed exercises and guided students through networking scenarios using Cisco Packet Tracer.
- Simplified complex networking concepts and adapted teaching methods to different student skill levels.
- Helped students develop practical problem-solving skills for networking coursework and assessments.

Vulnerability Analyst & Penetration Testing Trainee — Digital Egypt Pioneers Initiative (DEPI) | 6-Month Training

- Completed a six-month professional training program focused on vulnerability analysis and penetration testing.
- Developed practical knowledge of identifying, analyzing, and assessing security vulnerabilities.
- Studied penetration testing methodologies and security assessment techniques.
- Applied cybersecurity concepts to analyze potential weaknesses in systems and networks.
- Developed a foundation in vulnerability assessment, security testing, and offensive security practices.

PR & Logistics Member — Competitive Programming Club (CPC), E-JUST

- Organized and coordinated technical workshops and competitive programming events serving 100+ students.
- Managed event communications and logistics to ensure smooth execution of technical activities.
- Collaborated with team members to support algorithmic training sessions and programming activities.

PROJECTS & ACHIEVEMENTS

3D Unity Maze Survival Game

- Reduced game memory usage by 15% through optimization of C# scripts and asset management.
- Improved NPC pathfinding efficiency by 20% by developing an AI-based navigation system.
- Completed the full 3D game development lifecycle one week ahead of the academic deadline.

Robot Hallway MDP — Python

- Achieved 90%+ accuracy in a Robot Hallway Markov Decision Process simulation.
- Implemented and fine-tuned an optimal policy using Value Iteration.

Library Database — SQL

- Optimized SQL queries and database operations, reducing search execution time by 25%.

Competitive Programming

- Solved 50+ complex algorithmic problems on Codeforces and LeetCode, strengthening algorithmic problem-solving and data-structure skills.

CERTIFICATIONS & TRAINING

Digital Egypt Pioneers Initiative (DEPI) — Vulnerability Analyst & Penetration Testing, 6-Month Training
